

A/C Component Locations Overview – Engine Compartment

1 - Accumulator
4 - Low pressure service valve
5 - High pressure service valve
6 - Dust and pollen filter Vehicles from 10.00,
7 - Evaporator In heating and A/C unit
8 - Engine Coolant (EC) Switch-Off Valve (heater) - N279 - 8-cylinder engine only
10 - Pressure relief valve
11 - Coolant Fan Control (FC) Control Module - J293 -
12 - Compressor A/C Clutch - N25 - on 4 & 6 cylinder engines.Externally regulated compressor without A/C clutch - N25 - on 8-cylinder engine
13 - A/C Clutch - N25 - Not for 8-cylinder engine
14 - Condenser
15 - Outside Air Temperature Sensor - G17 -
16 - A/C Pressure Switch - F129 - or High Pressure Sensor - G65 - Note: Application is engine dependent.
q A/C Pressure Switch - F129 -,from 10.00
